The need for quick solutions for office spaces has made office containers the emerging trend for most businesses, organizations including schools and churches looking to set-up additional or temporary office spaces.

Frontier containers specializes in designing, customizing containers to meet specific needs and requirement of our clients buy creating doors, windows, insulation and interior lining, electrical wiring and fittings, assorted flooring options among them; ceramic tiles, Epoxy, laminate, rubber tiles among others.

Office containers can come with washrooms, kitchenette, and cabinets and with a varieties of options.

Key benefits of using container for stalls:

- **Portable;** office containers are easily portable and can be relocated from one site to another making it perfect solution for most organizations.
- **Easy to set-up;** fabricated off-site and delivered to the destination ready for use.
- **Modular in nature;** Can be acquired in phases as need for more space arises.
- **Delivery timeline;** less time to set-up an office container.
- **Cost friendly;** significantly cheap to build an office container than any other building methods with similar specifications.
- **Secure:** Containers are built with heavy gauge sheets that difficult to cut-through.

Office containers offer a practical and cost effective solution

Containers are durable and can withstand harsh weather conditions. They are portable and can be transported to different locations, making them suitable for businesses that need to move frequently or for temporary set-ups.

Ideal for real-estate companies, construction companies, mining operations that requires setting up bases in remote regions (mines) which are bound to be relocated after the life of the mine.
