Shipping containers provides a quick solution for commercial business spaces which allow the investor to conveniently turn an idle property into an income generating investment.

Key benefits of using container for stalls:

- **Portable;** perfect for leased land where they can be relocated after the lease period
- **Easy to set-up;** fabricated off-site and delivered to the destination ready for use.
- **Modular in nature;** can be acquired in phases to base on need or as resources become available.
- **Delivery timeline;** Less time to set-up a shopping mall with containers
- **Cost friendly;** significantly cheap to build a commercial shopping Centre with containers that any other building methods with similar qualities.
- **Secure:** Containers are built with heavy gauge sheets that difficult to cut-through.

We convert both 20ft and 40ft containers into portable commercials stalls available in the following sizes.

- 20ft completely partitioned into 3shops of dimensions 8ft x 6.67ft
- 40ft container partitioned into 5shops of dimensions 8ftx8ft
- 40ft Container partitioned into 6shops of dimensions 8ftx6.67ft

Our stalls come complete with the following features.

- Electrical wiring, lighting systems, socket outlets, circuit breaker for each shop done to allow use of Token meter.
- 5x8ft Roller shutter doors which makes them, elegant, extra secure and burglar proof.
- Spray painted both internal and externally with colors of clients choice for avoidance of rust, branding and for beauty.

We have 2 broad categories of stalls depending on the types of doors used.

- **ROLLER SHUTTER STALLS;** these are container stalls fitted with roller shutter doors. All other features are the same. These are the most favorite for many clients mainly because these doors are space friendly.
- **CUT-OUT DOORS;** these are container stalls fitted with container cut-out doors. In simpler terms, the section of the container cut to create shops openings are modified into doors are fitted back with high level of precision.
