---

Shipping containers are a quick solution in areas that instant storage spaces are required. They are best due to their unique features that allow portability meaning they can be moved from one site to another with ease, modular meaning they can be acquired in phases as need for more space increases, strong and secure meaning making them bulger proof and best for storage of valuable goods on site, water/leak proof making it best for storage of weather sensitive goods.

## **(20-foot) Container (6m)**

20ft container is the smallest unit we stock and it offer an affordable quick solution for storage purposes and customization where small spaces are required. It is easy to deliver in tight spaces since the crane truck used to deliver is significantly small making it easy to maneuver around the delivery site

## **40ft high cube container (12m)**

40ft containers are available in 2 size: 40ft high cube and a standard 40ft GP (popularly known as Low Cube. The mainly stocked is 40ft high cube due to expanded volume approximately 76M<sup>3</sup> creating enormous storage space. Typically used as stationary or mobile warehouse. They are also perfect for customization for accommodation purposes because their height gives favorable headroom.

**Syokimau katani Road, Opposite Syokimart,  
P.O. BOX 32554-00600, Nairobi**
